DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment filed on 6/18/2004. It is noted that in the mentioned amendment, applicant has made amendments to claims 1, 7, 15, 17, 18, 22, 23, 34, 35 and 38; canceled claims 14 and 36 and added one new independent claim 51 into the application. As a result of entering the amendment, the pending claims are claims 1-13, 15-35 and 37-51 in which claims 20-21 and 39-41 are non-elected claims.

Specification

2. The lengthy specification which is amended by the amendment of 6/18/2004 has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2872

4. Claim 51 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 and 8-11 of U.S. Patent No. 6,646,819 in view of Kleinburg et al (U.S. Patent No. 5,299,053).

The device as claimed in claims 1-2 and 8-11 of the Patent No. 6,646,819 discloses a mask having a variable-size, angularly positionable, sector-shaped aperture located in an objective aperture of an optical imaging system and a control for generating a signal to continuously change the position of the aperture. The only feature missing from the mentioned claims of the patent '819 is that the claims do not positively recite that the control comprises a motor for rotating the mask. However, the use of a motor for continuously rotating a mask having sector-shaped aperture in an optical device is known to one skilled in the art as can be seen in the microscope provided by Kleinburg et al. See column 5 and fig. 2 which discloses a rotating disc (68) having sector-shaped aperture (64) wherein the disc is rotated by a motor and the rotation is made in a continuously manner with plural revolutions. Thus, it would have been obvious to one skilled in the art at the time the invention was made to modify the device as disclosed in the claims 1-2 and 8-11 of the Patent '819 by using a control having a motor as suggested by Kleinburg et al for continuously rotating a disc having at least one sector-shaped aperture.

Allowable Subject Matter

5. Claims 1-13, 15-19, 22-35, 37-38 and 42-50 are allowed.

6. This application contains allowable claims as mentioned above. The application still contains non-elected claims 20-21 and 39-41 which are not rejoined to the allowed claims due to the differences between the device of claims 1-13, 15-19, 22-35, 37-38 and 42-50 and the device of claims 20-21 and 39-41. Thus, applicant is suggested to cancel non-elected claims or take other appropriate action in response to this Office action.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

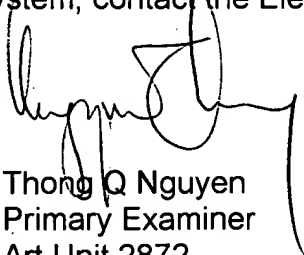

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
